

PREFACE

Trade Unions have proliferated due to rapid economic development and development in particular. The setting of industrial units involving wide spread use of machinery, changes in working and living environment of workers, concentration of industries in large towns have brought the workers together to maintain and improve their bargaining power and hence their employment conditions. The first organized Trade Union in India named as the Madras Labour Union was formed as early as 1918. Since then, a large number of Unions came up in almost all the industrial centers of the country. The government of India passed the "Trade Unions Act,1926" to regulate conditions governing the registration of Trade Unions, obligations imposed on a registered Trade Unions and right and liabilities there of. The Rules Framed under the "Trade Unions Act,1926 impose obligation on the registered Trade Unions (Workers & Employers) to submit annual statutory return in the prescribed format to the Registrar of their respective States/ Union Territories. These State/U.T. Authorities in turn furnish the consolidated data in respect of the entire State/U.T. to the Labour Bureau. The Labour Bureau compiles and disseminates these statistics at All India level.

The present biennial review presents comprehensive statistics on the working of the Trade Unions Act, 1926 during 2008. It is based on the Annual Returns received from the Registrar of Trade Unions of the respective States/Union Territories.

I am thankful to the Registrar of Trade Unions of all the responding State Government/Union Territory without whose support it would not have been possible to bring out this Report. I also place on record my appreciation for the work done by the team of officers and staff members of Labour Bureau, whose names appear in Annexure IV.

Suggestions for further improvement of this publication are welcome.

Chapter I

Salient Features of the Trade Unions Act, 1926

Trade Unions are organization of Workers as well as Employers formed to protect and promote the interest of their members. Trade Unions have made headway due to rapid industrial development. The workers come together to maintain and improve their bargaining power on wages and working conditions. The first organized Trade Union in India named as the Madras Labour Union was formed in the year 1918. From the beginning itself, Trade Unions were not confined to workers alone. From 19th Century itself there were Employer's associations in the form of Chamber of Commerce, Industrial Associations etc. to protect and promote the interests of their members in a concerted manner. After independence, expansion of industrial activity and grouping worker's Trade Unions acted as a spur for strengthening and expansion of employers' organization.

In 1926, the Trade Union Act was passed which was a landmark in the history of Trade Unions in the country. The Act gave legal status to the Registered Trade Unions and conferred on them and their members a measure of immunity from Civil Suit and Criminal prosecution. Registration of Unions enhanced their status before general public. The Act gives protection to registered trade unions in certain cases against civil or criminal action. Employers and Registered Trade Unions are required to submit annual statutory returns to the Registrar of Trade Unions of respective States/Union Territories regarding their membership, sources of income, distribution of expenditure and detail of assets and liabilities, who in turn submit consolidated return on all these aspects to Labour Bureau in the specified proformae.
